Date: 16.12.13

## Circular

We are going to change our proxy firewall to Quick Heal UTM. In this connection, you are requested to follow instructions as follow. Certificate for using internet is uploaded on website, circular tab.

**Step-1**
  **Disable proxy settings in Internet Browser. (If already enabled)**

   A. Internet Explorer –
   - Tools, Internet Options, Connections, LAN Settings,
   - Remove Tick from use proxy server for your LAN

   B. Firefox –
   - Tools, options, Advance, Networks, Settings, Click on NO PROXY

   C. Chrome –
   - Settings, Show advance settings, Change Proxy setting, connection, LAN settings,
   - Remove Tick from use proxy server for your LAN

**Step-2**
  **Add Quick Heal Certificate in Browser (Certificate is available on institute website, circular tab)**

   Internet Explorer
   - On the Menu Bar, click Tools, Internet Options
   - Select Content tab and, under Certificates section, click Certificates to display Certificates Window.
   - Select Trusted Root Certification Authorities tab and click the Import button to start Certificate Import Wizard.
   - Import the Certificate downloaded.

   Firefox
   - On the Menu Bar, click Tools -> Options to display the Options window.
   - Select advanced tab under which select Encryption tab.
   - Click View Certificate to display the Certificate Manager window.
   - Select Authorities tab and click Import.
   - Select the Certificate and click Open.
   - In the Downloading Certificate window, select Trust this CA to identify websites and click OK.

**Step-3**
  **User Name and password for using internet**

   - Username will be enrollment number.

   - Students have to collect their password from Mr. Jitendra Solanki, Lab Assistant at **C-103** and Mr. Dinesh Gohil, Lab Assistant at **C-203** by producing Identity Card.

   - All the students are advised to change their password on first login.

**Step-5**

**Change password**

Start browser, enter any website. Enter username and password in following dialog box of Quick Heal UTM shown below.

Click on option and change password, and change your password

Change your password

**Notes:** <span style="color:red">**- Do not forget to click on "logout" before closing browser**</span>
<span style="color:red">**- Login page should remain open to browse internet**</span>
<span style="color:red">**- Do not assign IP address to LAPTOP / MOBILE / TABLET. IP address will be assigned by DHCP**</span>
<span style="color:red">**- No need to follow Step-2 in mobile / tablet**</span>
<span style="color:red">**- Multiple user login is not allowed**</span>

**Tips** <span style="color:red">**- You can check your log (usages of internet and website open) by clicking user reports**</span>

In case if you need any guidance, please contact Hiren Trivedi **(9904405983)**
